

organic products grown in a sustainable habitat

October 30, 2018

TO: All Natural Habitats US customers

SUBJECT: Use of Radiation, Irradiation, Sewage Sludge, Ethylene Oxide and Steam Treatment

Please note that all palm oil products sold to US customers are 100% certified organic, fair trade, non-gmo, and kosher.

There is no use of radiation, ethylene oxide and no sewage sludge or irradiation.

Regarding Steam Treatment:

In every refining or deodorization process, the product is heated by means of coils that are at the bottom and sometimes at the sides of the storage tank or process tank. In the coils, steam is being used to re-heat the product. There is no direct contact between the product and the steam.

Sincerely,

Mark Griffin, Managing Director, Natural Habitats U.S.
